Primabene® Premium Natural Oils have a positive effect on our health (internally and externally).

Good for nutrition

Vegetable oils are a valuable energy source for our body. Important measures of quality are smell and taste. The importance of vegetable oils for nutrition depends, however, on its molecular structure: the lipid profile determines it's health benefits.

Good for cosmetics

Our range of essential and natural vegetable oils is being used in many applications: As a base for soothing creams or ointments, aromatherapy, for massages, etc. The characteristics of our natural oils have a significant positive influence on the finished product.
